GitHub Contribution as commits

NOTE: I (Jorge Moreno) committed a lot of things but for some reason it does not show that I did not commit anything. I did all the backend stuff as well as the database that stored user info and tags. I.e. I did everything that is in SQL Script folder (95%).

NOTE: 2(Zhou Xie) I also committed something but it looks like it is the same reason it is not showing up. Also some of my works does not go through the GitHub or it is not upload from my laptop. I.e. Jorge and me collect the resource (The resourceList.JPG) and something like the background.jpg. (which we did not really use at the end)
